PROFESSIONAL SUMMARY

Designed and deployed production AI-assisted compliance tools, built XML/XSD governance architectures, and engineered automated regulatory workflows that solved foundational infrastructure problems with direct impact on pilot safety and FAA/IOSA compliance. Nine years at Delta Air Lines spanning Flight Operations, Technical Operations, Supply Chain & Logistics, and Airport Customer Service — with deep expertise in AQP regulatory frameworks, IOSA documentation standards, and structured content architecture. Translates complex regulatory requirements into scalable technical solutions, identifies enterprise-level compliance gaps others miss, and architects the governance frameworks that fix them. Combines rare domain expertise in regulated aviation environments with hands-on technical platform capability to serve as a trusted solutions advisor at the intersection of AI, governance, and compliance.

CORE COMPETENCIES

Regulatory Frameworks: FAA AQP (AC 120-54A), IOSA ORG/FLT Standards, 14 CFR Part 121

Compliance Systems: Document control architecture, dependency mapping, audit readiness

AI & Automation: Conversational AI agent development, workflow automation, Power Platform

Content Architecture: XML/XSD schema design, structured authoring, Comply365 DocuNet

Platform Administration: Microsoft 365, SharePoint, Smartsheet, LMS, SailPoint, JIRA, TRACS

Process Improvement: Lean Six Sigma Black Belt, change management, operational transformation.

Technical Enablement: Governance framework design, competency architecture, adoption strategy, LMS admin.

Stakeholder Adoption: Instructional Change management, cross-functional alignment, enterprise onboarding (3,500+ employees).

Client Advisory: Executive presentations, discovery sessions, industry conference representation, technical advisory

PROFESSIONAL EXPERIENCE

Technical Lead, Regulatory Compliance & Documentation Systems Architecture

Nov 2023 – Present

Delta Air Lines, Flight Operations Pilot Learning | Atlanta, GA

Technical lead and product owner for AI implementation, platform modernization, and regulatory compliance systems, within Delta's Flight Ops Pilot Learning division. Responsible for designing the document control architecture that governs consistency between the authoritative AQP manual and downstream training device modules — directly addressing IOSA documentation control requirements and FAA internal consistency standards.

- Designed and implemented an XML/XSD structured content architecture for the AQP authoritative manual seven cross-fleet DIG training modules — enabling machine-readable dependency mapping between regulatory documents for the first time at Delta Flight Ops.
- Built a queryable HTML interface that identifies all downstream document changes required when any section of the AQP authoritative manual is updated — eliminating manual tracking and creating a defensible audit trail for FAA and IOSA review.
- Co-developed a proprietary conversational AI agent with Delta and a technology vendor to enable natural language search across Delta's Flight Ops manuals and training documentation — defining use cases, requirements, and acceptance criteria for the tool.
- Led enterprise platform modernization across four systems: Jira to Smartsheet, SharePoint Classic to Modern, and AeroDocs to Comply365 DocuNet — managing change impact, stakeholder communication, and user adoption.
- Designed and executed full UI/UX redesign of Pilot Learning and Development SharePoint – Migrating from Classic to Modern while architecting site structure, information hierarchy, taxonomies, navigation, page layouts, branding, and permissions governance for a division-wide platform serving pilots, instructors, and learning designers.
- Automated regulatory workflows using Microsoft Power Platform and Smartsheet, reducing manual processing time and improving compliance reporting accuracy.
- Co-chair of the Manuals Management Working Group — facilitating cross-divisional alignment on documentation standards, revision processes, and compliance obligations.
- Conduct technology capability and integration assessments for new platforms — translating operational and regulatory requirements into technical specifications and process maps.
- Authored and edited technical content in Adobe FrameMaker for DIG training modules in accordance with our compliance standards.

Training Program Designer & Continuous Improvement Lead

Aug 2022 – Nov 2023

Delta Air Lines, TechOps | Atlanta, GA

Selected to implement my Lean Six Sigma Green Belt project to our largest hub and busiest airport in Atlanta, Georgia on the Line Maintenance Operations. This redesign was focused on training curriculum development and onboarding standardization for TechOps Supply Chain Operations.

- Designed end-to-end curriculum for Supply Attendant, Lead, and Logistics Attendant roles — including learning resources, support documentation, and job aid packages.
- Established a centralized local repository for all SOPs, job aids, and troubleshooting documentation — directly addressing the information fragmentation that triggered the Green Belt project.
- Created learning analytics tools to track progress and identify program enhancement opportunities.
- Facilitated instructor-led training in both classroom and live operational environments.

Technical Onboarding Instructor - Domestic and International

Aug 2021 – Aug 2022

Delta Air Lines, TechOps | Atlanta, GA

- Led 5-day TechOps New Hire orientation program — successfully onboarded over 3,500 employees across domestic and international maintenance hub locations.
- Chairman's award nominee and Top Rated TechOps Facilitator
- Designed and developed instructor-led courses including New Hire Training, Mobi-Lock Vacuum Anchor System, Jetiquette, Ergonomics, Concur Business, and Employee Assistance Program.
- Served as primary HR liaison overseeing I-9 verification, badging, fingerprinting, application access, and LMS integration for all incoming employees.
- Built onboarding workflows, job aids, and system guides across LMS, SAP, Concur, and HR access platforms.

Supply Attendant — Training Lead & MRO Services

Dec 2018 – Aug 2021

Delta Air Lines, TechOps Line & Base Maintenance | Minneapolis, MN

- Subject matter expert across enterprise operational systems including SAP, SCEPTRE, MRO Hawaiian, WebVision, PartTrac, and SafeTrac — trained and onboarded new supply attendants using self-developed SOJTs.
- Spearheaded the LAST tool project — a SharePoint and SAP-integrated plugin that centralized training resources across international maintenance hubs, leading to relocation to Atlanta for expanded scope.
- Supported MRO maintenance operations for external airline clients including Virgin and Hawaiian Airlines — managing parts sourcing, aircraft kitting, and supply chain coordination under AOG time-critical conditions for both Line and Base Maintenance.
- Dangerous Goods Certified — managed purchase orders, resolved parts shortages, and followed international shipping protocols across FedEx, Fortigo, Expeditors, and UPS.

Airport Customer Service Agent & Customer Resolution Officer

Apr 2017 – Dec 2018

Delta Air Lines, Airport Customer Service | Minneapolis, MN

- Managed passenger touchpoints across ticketing, gates, and baggage claim — trained Customer Resolution Officer for medical emergencies and service recovery.
- Served as Spanish interpreter on international flights — supported compliance with airline, federal, and international travel regulations.

EDUCATION

Bachelor of Arts — Triple Major: Psychology, Business Management, Mass Communications

University of Minnesota

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Lean Six Sigma Black Belt — AQP Airbus Cross Crew Qualification Analytics (2024)
- Lean Six Sigma Green Belt — TechOps Training Leader Development Curriculum (2023)
- Instructional Systems Design (ISD) (2025)
- Microsoft Power Platform (2025)
- Smartsheet Core Product Certification (2024)
- Dangerous Goods Certification (2022)
- Principles of Leadership (2022)
- Teaching English as a Second Language — TESOL (2021)
- Teaching Spanish as a Second Language — TSSOL (2021)

INDUSTRY ENGAGEMENT & THOUGHT LEADERSHIP

- World Aviation Training Summit (WATS) Annual delegate representing Delta Air Lines in working group discussions on AI implementation, training standards, and technology adoption in aviation.
- IOSA International Conference — Annual representative in IATA working group discussions on documentation governance and operational compliance standards.
- Cross-Airline Benchmarking Program — Coordinates inbound and outbound benchmarking visits between Delta and peer carriers — facilitating structured knowledge exchange on training operations and AI tool adoption.
